How to Create a Search Alerts
1) To create alerts, you need to **Register** for a personal account.
2) You can create a search alerts to be notified by email of new documents in Scopus that match the search in your alert.
3) Click **set new search alert**

You will receive an alert each time one of these searches renders new results in Scopus.

No Search Alerts have been set, click on **Set new search alert** to set a new alert.

4) Enter and run a search

Document search

Search

**athletes AND stress**

*E.g., "Cognitive architectures" AND robots*

> Limit
5) Above the Search results, click **Set alert**
6) Enter information into the appropriate entry fields for the alert:

- In the **Name of alert** field, enter a name for the alert.
- Enter an **E-mail address** for alert notifications. Note: You can also enter email addresses of colleagues. Separate multiple email addresses with a semicolon, comma or space.
- From the **Frequency** drop-down list, select how often you want to receive alert email notices. Note: You do not receive an email if there are no alerts during the frequency you select.
- Select **Active** or **Inactive** as the status of your alert.
- Click **Set alert**. You will receive an email confirmation summarizing all alert preferences you have set.
